duck

LIST 2-33. ANIMALS THAT MIGRATE

Many animals periodically travel a long route and return to their point of origin or migrate over long distances in search of food, water, shelter, warmer weather, a place to mate, or a place to lay eggs or raise young. Destruction of any part of the migratory route threatens the existence of the species. Examples of animals that migrate:

ANIMAL	GROUP	ANIMAL	GROUP
American Goldfinch	Bird	Loons	Bird
Arctic Tern	Bird	Monarch butterfly	Insect
Canada Geese	Bird	Red Knot	Bird
Caribou	Mammal	Robin	Bird
Dunlin	Bird	Ruddy Turnstone	Bird
Eastern Meadowlark	Bird	Salmon	Fish
Evening Grosbeak	Bird	Sandpipers	Shorebird
Flickers	Bird	Short-Tailed Shearwater	Bird
Flycatchers	Bird	Tanagers	Bird
Garden Warbler	Bird	Vireos	Bird
Green sea turtles	Reptile	Warblers	Bird
Hudsonian Gotwit	Bird	Whooper Swan	Bird
Hummingbirds	Bird	Wildebeest	Mammal
Humpback whale	Mammal	Zebra	Mammal

Note: Plural form denotes more than one species; for example, there are ten species of Vireos, fifty species of Warblers, and four species of Tanagers.
