

# BIRDS and BEYOND

Learning about how Birds and Conservation go together, students in this program first learn about habitats, conservation, and what makes a bird *really* a bird. They get to handle a large variety of toy stuffed birds, and listen to the various calls & songs made by the different species of birds. (Grades K-6, 30-45 minutes)

Educators can even borrow the "ALL ABOUT BIRDS" Educational Kit, featuring a Bird Beak Adaptation Activity, as well as many other educational resources. **FREE!**
