

MIGRATION MANIA

What animals migrate? Why do animals migrate? Students will learn the answers to these questions as they listen to the Migration Mania presentation. Following discussion, students will become “ducks” and do an activity on migration, as they play the role of a bird as it migrates from its nesting habitat to its wintering habitat. They learn about the hazards of migration and the effects humans can have on habitat.

Large area needed for activity.
(Grades 2nd—6th, 30-45+ minutes)
