

2-8. Thinking Scientifically: Why Migration?

Many animals and insects migrate seasonally or annually for special reasons. Why do they migrate? Several migrators are listed below but their names are scrambled. First, unscramble the names and then match the name of the animal or insect with its picture.

Select three migrators and find out about their unique migration pattern. Who goes where? When? Why? Write that information on the "Migration Chart."

Migration Chart

NAME OF ANIMAL	DESTINATION	WHEN?	WHY?
<i>Example:</i> Monarch butterfly	Mexico from Canada	Fall	to lay eggs en route

Now, you write about three other migrators below.

1.

2.

3.
