

Ag Plastics Recycling!

The **Success** of Ashland, Holmes, Stark & Wayne Counties RAPP (Recycling Ag Plastic Partnership)

Launched publicly in April of 2013, we have collected over 220 TONS* (that's 440,000 pounds) of plastic film we have saved from the landfills or from being illegally burned. (*as of Jan. 2015.)

Plastic is **manually** sorted. It is then baled into bales that weigh about 1,000lbs each. Types of bales are:

- *All White—bale wrap.
- *Mixed—Black & White
- *Feed Sacks, Poly Twine & any poly-type bag
- *Black—Row Mulch & Irrigation Tubing.

Keep as Clean as Possible!

THE RAPP SUCCESS COULD NOT BE DONE WITHOUT MANY IMPORTANT PARTNERS! SPECIAL THANKS TO ALL!
